### **CRITICAL UPDATE REGARDING CLEANING SONY SENSORS**

**!!! MUST READ !!!**

Due to some recently damaged sensors with some users and their Sony A7's, and even a few Nexus, we have changed our recommended cleaning fluid to Aeroclipse due to the much lower methanol percentage.

### **DO NOT USE ECLIPSE ON THESE CAMERAS !**

The problem arises from aggressive cleaning and or too much fluid when using Eclipse.

As we mentioned earlier, our new ULTRA swab material requires slightly more fluid and more pressure, which when used on Sony sensors may cause damage to the coating.

Three handwritten signatures in blue ink, likely belonging to David, Samantha, and Elizabeth Stone.
